

# HYGIENE & SAFEGUARDING

Your health & safety is our priority. To adhere to the latest government guidelines on social distancing and in order to give our customers the best experience, we have implemented the following changes to our procedures and premises. Please read them carefully and please contact us if you have any concerns.

## MAKE-UP AREA

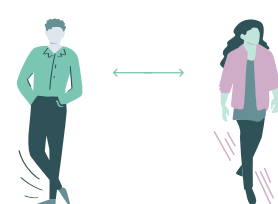

All MUAs (make up artists) will be wearing PPE at all times including masks & Perspex visors

Strict hygiene standards as always with careful cleaning of tools and work area between each client

MUAs will have Barbicide COVID-19 certification demonstrating their dedication to infection control

Social distancing between clients will be maintained at all times

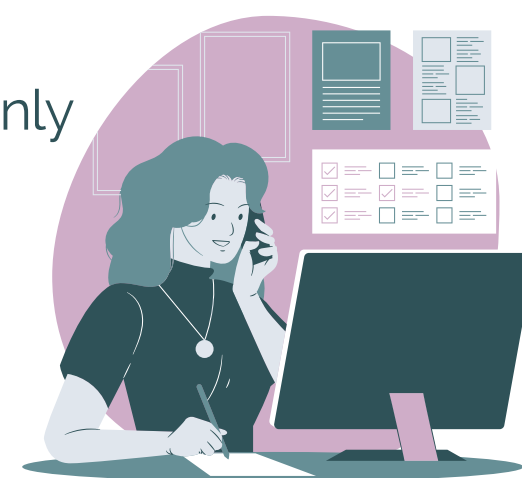

## DIARY MANAGEMENT

We have closed one of our two studios to reduce the number of staff and customers in the building

Symptom checker process is carried out with every client pre-appointment

Attendees for **together** experiences must co-habit

We are asking for only those who are participating in the session to be present, no guests please

## WAITING ROOM

Rearrangements to ensure social distancing is in place and can be maintained at all times

Hand sanitiser available by self-service counter (and across all areas of the building)

## SHOOTS & VIEWINGS

Studio spaces will be thoroughly sanitised between every client by 'leapfrogging' between two studios to allow time for cleaning

Photographers maintain social distance at all times

Viewings to take place in our family studio (next door) where rooms are more spacious
